Linear Air Re-Launches Low Cost Jet Air Taxi Service in New York City Region

Wildly economical Eclipse jets again based at Westchester County airport, serving business and leisure travelers at average rates 40% less than area competitors

White Plains, NY, April 19, 2010 – Linear Air, a provider of point-to-point air taxi service, announced today the re-launch of its Eclipse E500 flight service in the greater New York City area. The expansion of its fleet back to the New York region reaffirms the company’s commitment to offering business and leisure travelers unprecedented access and affordability to private jet travel.

Linear Air’s Eclipse E500 is the leader in a new class of light jets poised to redefine air travel. Using less fuel than other light jets, the ecofriendly and efficient, twin engine Eclipse E500 offers jet aircraft performance at an unprecedented lower overall cost. The savings are passed on directly to the Linear Air customer, allowing the company to offer rates an average of 40% less--and as much as 57% less--than area competitors. “Linear Air’s goal is to provide a high-quality travel experience that is hassle-free, time efficient and cost effective,” said William Herp, president and CEO of Linear Air. “With convenient and personalized service, Linear Air is pleased to offer business and leisure travelers in the greater New York City area the most economical and convenient option for air travel.”

In addition to cost-savings, other considerations that make air travel with Linear Air appealing include:

- Linear Air serves 10 times more airports than the traditional commercial airlines serve. By utilizing regional airports, Linear Air can accommodate clients’ air travel needs from locations that are closer to their homes and offices. This saves travelers the time, headache, and expense of commercial airports.
- The flexibility of Linear Air’s air taxi service allows business travelers to land in destinations not served by commercial airlines, creating opportunities to reach remote or multiple destinations in single day trips. Air travel is easily complemented by accessible ground transportation options.

- Business travelers benefit from the ability to turn travel time into productive work time by flying in well-appointed comfortable cabins conducive to conducting meetings.
- Leisure travelers are able to more easily make weekend trips from New York to Nantucket or Martha's Vineyard by avoiding the long security lines and other hassles associated with commercial air travel.

Linear Air's aircraft is based at the White Plains/Westchester County Airport in New York, but will be servicing major and regional airports throughout the tri-state region, as well as the Northeast and mid-Atlantic.

About Linear Air

Based in Concord, Massachusetts, Linear Air is a FAA-certified part 135 charter operator providing air taxi service using the revolutionary four-passenger Eclipse 500 business jets. Linear Air offers business and leisure travelers access to more than 750 cities in the Northeast, Mid-Atlantic and eastern Canada from its bases in Boston and New York. Linear Air maintains a Gold safety rating from ARG/US, the leading independent safety auditor in the aviation industry.
